- [Convert Music Files](#)
- [Check Conversion History](#)
- [Free Tools](#)

### Choose Output Settings

Click the Setting icon on the lower left of corner to choose the Output Format

(MP3/AAC/FLAC/WAV/AIFF/ALAC), the Output Quality (320kbps, 256kbps, 192kbps, 128kbps) and Output Path.

In addition, for better organizing your music library, you can save the output audio files into an organized folder like Artist, Album, Artist/Album, or Album/Artist.

**Note:** If you choose **AUTO**, you can get the best output quality as the original audio.

## Import Music Files

Open a playlist, artist or album, then click on the “Click to add” button and select the songs that you'd like to convert from the popup window.

Macsome Tidal Music Downloader supports converting multiple playlists in batch.

## Convert Music Files

Click the "Convert" button to start converting the selected songs to the output format you have chosen.

## Check Conversion History

Once the conversion is done, you can find the downloaded Tidal songs by clicking  “Converted” tab on the left or directly going to the output folder you customized in previous step.

## Free Tools

Macsome Tidal Music Downloader offers two useful tools for free. Hit on the **"Tools"** option from the left toolbar, you will find two sections: **"Format Converter"** and **"Tag Edit"**.

The Format Converter is specially designed for converting local audio files to plain audio formats, including MP3, M4A, FLAC, WAV, OGG, and AIFF. To begin, click the "+ Add" button to select local audio files from your computer. You can also set the output format, output quality, and output path. Then, click "Convert" to output it in your desired format.

In the Tag Edit section, users can modify the tag information of songs. Click the "+ Add" button to select local audio files from your computer, then simply click "Save" to preserve the changes.
